• AMERICAN •

FRESNO TRACTOR HITCH

Shown Attached to Fresno Scraper

APPROXIMATE SHIPPING WEIGHT

	Weight	Code
Hitch complete with 5' scraper.....	435 lbs.	ITCH
Hitch complete with 4' scraper.....	400 lbs.	STITCH
Hitch only.....	240 lbs.	HITCH

Four bolts completely attaches Hitch to any four or five foot horse drawn Fresno Scraper Bowl ready to couple to the tractor.

Lever (A) regulates the depth of cut . . . once set for the job it need never be reset for that job. Lever (B) is the dumping lever . . . one pull spreads the load, a second pull dumps the entire load in a heap. Haul the scraper back to the loading place in the dumped position. Back tractor slightly to right the scraper ready for another load.

Detail instructions for assembling and attaching accompany each hitch.

WHEELBARROWS

The American is the most complete line of wheelbarrows on the market today, it includes a barrow for every purpose. Contractors, Industrial, Farm and Home, and Specially Designed Barrows.

Simplify Your Warehouse Problem with the American Line of Wheelbarrows

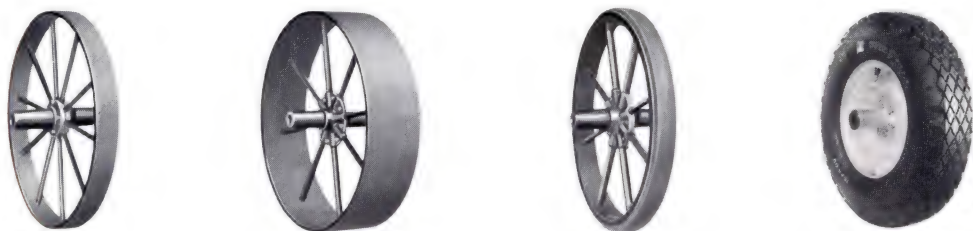

American Contractors and Industrial Barrows are Standardized

American Contractors and Industrial Wheelbarrows are interchangeable, any tray will fit any chassis. Legs, wheels, braces, wheel castings, tray rests, etc., are interchangeable between wood and tubular frames. Any wheelbarrow can be assembled from a standard stock of parts.

American Special Purpose Wheelbarrows are not interchangeable.

Heavy duty 16" diameter steel wheels, in proportion to the size and carrying capacity of the different barrows, are furnished as standard equipment. However, any American wheelbarrow can be equipped with extra wide tread steel wheel, solid rubber tread wheel or with pneumatic tire.

The Pneumatic Tire as shown can be had on any American wheelbarrow.
